

# HEALTH SERVICES GREENVILLE RANCHERIA

Substance use disorders have been an ongoing and critical issue in the North State communities for many years and have recently reached epidemic levels. Just about every person or family has had some experience with a friend or loved one who is struggling with substance abuse. Access to care for substance abuse has in the past been difficult and is of paramount importance to all of us as it relates to our overall public health and safety.

Greenville Rancheria in Red Bluff and Greenville, CA offers substance abuse treatment for alcohol abuse, opioid use disorder, and other substances such as methamphetamine use. We treat patients of all ethnic backgrounds including, but not limited to our Native American population.

John Pearson is a lifetime North state resident. He is a certified Physician Assistant and Family Nurse Practitioner with over 24 years of experience in a variety of specialties including orthopedic surgery, pain management, and addition. He has received specific training in addiction therapy and has clearance from the Drug Enforcement Agency to provide Medication Assisted Treatment (MAT) therapy. He is dedicated to treating addiction not only with medication, but monitoring patients progress as the participate in multifactorial treatment plan including counseling, behavioral health, and group therapy such as twelve step meetings.

“We are very honored to offer these services to our community in an effort to make it a safe and healthier place to live. We need to confront this issue head on and treat our families and friends experiencing these difficulties with compassion, care, and the medical care they deserve”.
